LeetCode GeeksforGeeks

Education

Vellore Institute of Technology

B.Tech in Electronics and Communication Engineering (AI and Cybernetics) (CGPA: 9.41)

Sep 2023 – Jun 2027

Bhopal, Madhya Pradesh

Govt. Excellence (CM Rise) Higher Secondary School

Senior Secondary School Certificate, Class XII – 94%

May 2023

Hatta, Damoh, MP

Govt. Excellence (CM Rise) Higher Secondary School

High School Certificate, Class X – 94.8%

July 2021

Hatta, Damoh, MP

Technical Skills

- **Languages:** C++, Python, DSA in C++, OOPS
- **Hardware & Embedded:** Embedded Systems, Microcontrollers, UART, Sensor Interfacing, GSM/GPS, ESP32, Arduino
- **Tools & Platforms:** GitHub, VS Code, LTspice
- **Core Skills:** System Integration, Hardware Testing, Debugging, Problem Solving, Technical Documentation
- **Core Subjects:** Analog Electronics, Digital Electronics, Embedded Systems, Robotics and Mechatronics, Autonomous Robotics
- **Communication:** English, Hindi, Written and Verbal Communication

Projects

Women's Safety Device [https://11nq.com/safetydevice]

May 2025 – July 2025

- Developed an IoT-based safety system using Arduino/ESP32, GSM, and GPS for real-time emergency communication and location tracking.
- Integrated GSM-GPS modules through UART and implemented communication workflows for automated alert generation and wireless data transmission.
- Performed system testing, debugging, and performance evaluation to improve communication reliability and overall system performance.

Smart Patrol Bot [https://11nq.com/smartpatrolbot]

Jan 2025 – Apr 2025

- Built an indoor security patrol robot integrating motion detection, wireless communication, live video streaming, and remote monitoring.
- Incorporated Bluetooth control and Telegram Bot API to automate real-time alerts, image capture, and remote communication.
- Carried out system integration, testing, debugging, and validation to ensure reliable operation across multiple components.

Automatic Aerator System (AquaDox) [https://sl1nk.com/aquadox]

Sep 2024 – Dec 2024

- Engineered an IoT-based monitoring system for real-time collection and management of dissolved oxygen, pH, and temperature data.
- Configured multi-parameter sensors for continuous data acquisition and implemented automated decision logic based on monitored conditions.
- Conducted data collection, system testing, and performance analysis to evaluate reliability and improve system efficiency.

Achievements

- Awarded Dream STARS Scholarship from VIT Bhopal University.
- Secured 1st position in district merit (Class XII); awarded State Merit Scholarship and Scooty.
- Recipient of the INSPIRE Scholarship from the Government of Madhya Pradesh.

Certifications

- Embedded System Design Internship (Maven Silicon) [https://11nk.dev/mavensilicon]
- Introduction to Internet of Things (NPTEL) [https://acesse.one/internetofthings]
- Applied Machine Learning in Python (Coursera) [https://acesse.one/machinelearning]

Extracurricular Activities

- Member, Electric Vehicle Club and Music Club
- Actively participated in cultural events during VIT Bhopal's ADVITYA Fest

Additional Information

- **Languages:** English, Hindi
- **Hobbies:** Singing, Crafts, Dancing
